The Company

We are an experienced group in the field of power generators, with over 15 years of expertise in all areas including sales, maintenance, design, implementation, and providing engineering consultations in the generator field. You may think this is the end of the sentence, but it's just the beginning of our journey.

At our company, we pride ourselves on delivering top-notch services and solutions to meet all your power generation needs. Whether you require a generator for residential, commercial, or industrial purposes, we have the knowledge and experience to provide you with the best options tailored to your specific requirements.

Our team of highly skilled professionals is dedicated to ensuring the highest level of customer satisfaction. We understand the importance of reliable power supply and the impact it has on your daily operations. That's why we go above and beyond to deliver efficient and cost-effective solutions that meet your power demands.

In addition to our expertise in generator sales and maintenance, we also specialize in design and implementation. We can assist you in creating a customized power generation system that perfectly fits your needs and maximizes efficiency. Furthermore, we offer comprehensive engineering consultations to address any technical challenges you may encounter. Our team of experts is always ready to provide guidance and support, ensuring that you make informed decisions regarding your power generation requirements.

Choose us for all your power generator needs, and experience the professionalism, reliability, and expertise that sets us apart. Contact us today to learn more about our services and how we can assist you in achieving uninterrupted power supply.

Diesel Generators

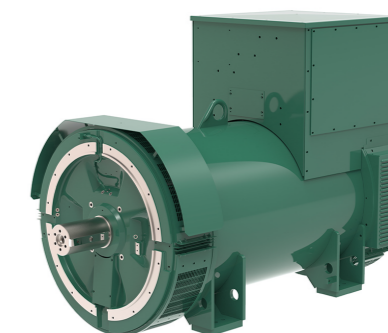

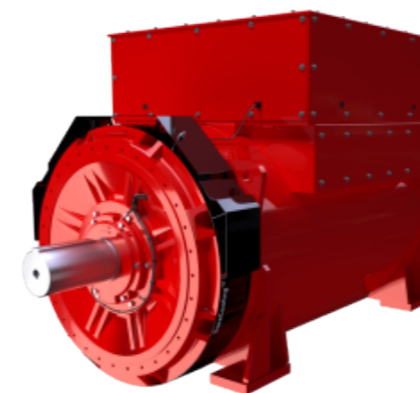

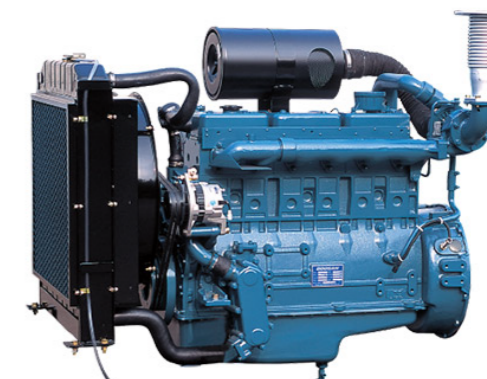

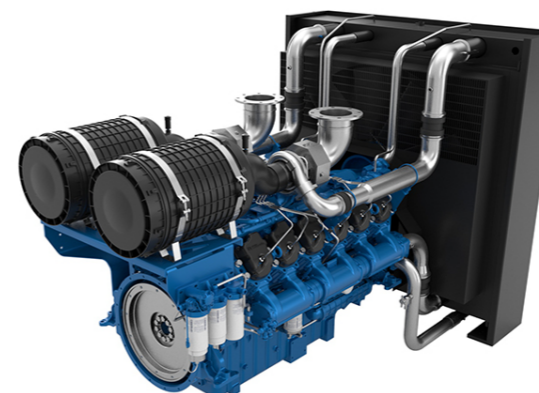

Energy Pro offers high-quality and efficient electricity generation units. These units operate with diesel engines of various capacities, starting from 15 kVA and up to 3000 kVA. These units consist of reliable and world-known engines such as (Perkins, Cummins, Baudouin and Doosan).

It is distinguished by being equipped with alternators from prestigious international brands such as the (Stamford and Leroy-Somer).

Energy Pro electricity generating units are characterized by strong performance and high reliability, making them the ideal choice for meeting electrical energy needs in various fields. Whether you need to generate electricity for homes, factories, or large projects, Energy Pro electricity generating units will provide you with the necessary electrical energy with high efficiency and superior performance.

Energy Pro electricity generating units are distinguished by their durable and advanced design, which ensures their use for long periods without any technical problems. It is also easy to operate and maintain, making it easy for users to take full advantage of it without any hassle.

Thanks to their high quality and outstanding performance, Energy Pro power generation units are the ideal choice for customers looking for reliable and efficient solutions for generating electricity. Depending on your specific needs, we can provide you with the right unit with the required power and preferred engine.

Sound Proof & Weather Proo

Sound Proof Cabins

Our company offers sound and weather proof cabins, designed and manufactured in accordance with the Egyptian Code and industry standards. The cabins are designed according to the needs of the engines in terms of the amount of air required for the engine cooling process. Our sound proof has sound levels of 75 dB at 7 meters and 65 dB at 3 meters. The cabin walls have a thickness of no less than 2 mm.

Weather Proof Cabins

Weatherproof cabins are designed and constructed to protect the units from the surrounding environment, including dust and rainwater. We pay great attention to providing the necessary protection for the units and ensuring long life and superior performance with same thickness not less than 2 mm.

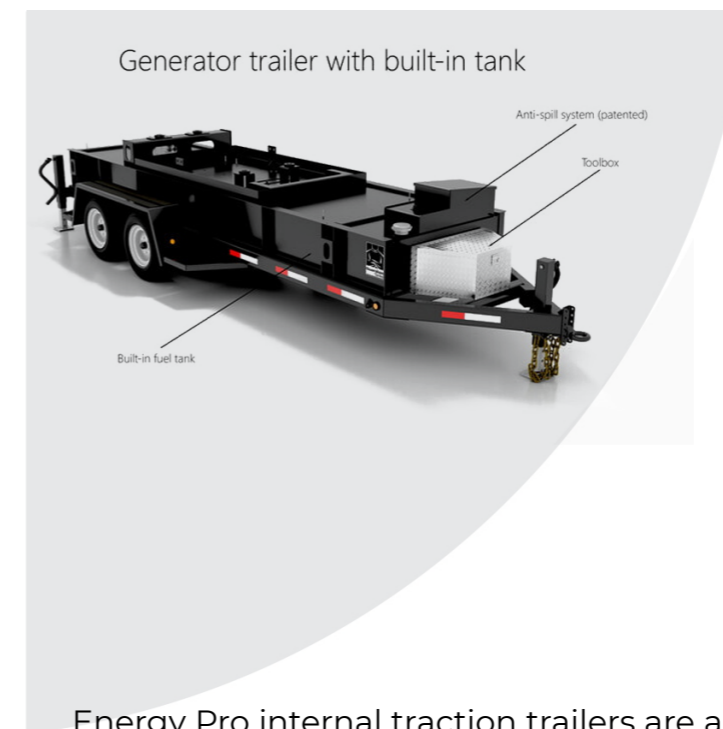

Invest in soundproof and weatherproof cabins from the industry leader. We guarantee you high quality and outstanding performance that fully meets your needs.

Trailers

Energy Pro offers internal traction trailers, which are designed and implemented with great care. Trailers are designed and implemented in accordance with the Egyptian Code and industry standards. They are specifically designed for use on sites at speeds of up to 60 kilometers per hour.

Choose internal traction trailers from Energy Pro to meet your needs for transporting loads easily and safely

Generator trailer with built-in tank

Built-in fuel tank

Our trailers are flexible in design and manufacture, as they can be implemented in many different configurations. It can be designed with 2 tires 1 axle, 4 tires 2 axle, or 6 tires 2 axle, in order to suite the nature of the load to be transported.

In addition, mounting brackets or a cable box can be added upon request. We strive to meet our customers' needs and provide them with customized solutions.

Energy Pro internal traction trailers are an ideal choice for companies and organizations that need to move units within sites quickly and efficiently. These internal traction tows provide high performance and durability that ensures its long-time use without any problems.

Fuel Tanks

- ✓ Energy Pro fuel tanks are the perfect solution to meet your fuel storage needs in a safe and reliable manner. These tanks are designed and manufactured to the highest global standards and unique client requirements, taking into account required consumption standards and on-site environmental conditions.
- ✓ Fuel tanks are available in a variety of capacities starting from 500 liters, up to 50,000 liters, allowing you to choose the size that suits your specific needs and requirements. They are also available in multiple shapes, whether cylindrical, cubic, vertical or horizontal, to suit the available space on your site.
- ✓ We ensure the design and implementation of unique fuel tanks, whether single-wall or double-wall, to ensure the highest standards of protection and safety are applied.
- ✓ We care about your safety and the safety of the tank contents, and therefore we are keen to provide the best technologies and materials to ensure that no leakage or unwanted accident occurs.
- ✓ Choosing fuel tanks from Energy Pro means choosing quality and reliability. Do not hesitate to benefit from our experience and distinguished services in the field of fuel storage. Get the fuel tank that precisely meets your needs and ensures the safety of you and your property. Contact us now for more information and to order your fuel tank

Spare Parts

Spare parts are considered one of the most important factors that affect the performance of generating units. Hence, Energy Pro comes to offer you a wide range of spare parts for all types of generating units, including (Perkins, Cummins, Baudouin, and Doosan).

We stock all types of filters to suit all capacities, as well as spare parts for alternators (Stamford and Leroy-Somer).

We care about ensuring that generating units operate at the highest possible efficiency, and ensuring continuity of work at sites.

Thanks to the high-quality spare parts we offer, you can count on your generating units to perform continuously and reliably. We understand the importance of business continuity and ensuring that the generating units operate in the best possible way.

By choosing spare parts from Energy Pro, you will get high-quality and reliable products that fully meet your needs.

Installation Work

At energy Pro, we pride ourselves on the variety of our services. We don't just stop at supplying power generation units; we also specialize in the installation of these units. This comprehensive approach ensures the efficiency and effectiveness of our power generation solutions.

Our dedicated team of experts is equipped with the knowledge and skills to handle all aspects of the installation process.

From the initial design phase to the final implementation, our team ensures that every installation is carried out with precision and attention to detail.

By having our in-house design team, we can tailor our installations to meet the specific requirements of our clients. This personalized approach allows us to optimize the performance of our power generation units, resulting in maximum efficiency and reliability.

At energy Pro, we understand that a well-designed and properly installed power generation unit is essential for the smooth operation of any business or project.

That's why we prioritize the quality of our installations and strive to exceed our clients' expectations.

If you're looking for a reliable partner that not only supplies power generation units but also takes care of the installation process, Contact us today to discuss your power generation needs, and let our experienced team provide you with a comprehensive solution that guarantees efficiency and reliability.

Maintenance Contracts

Maintenance contracts for electricity generation units are one of the services we provide at Energy Pro. These contracts are of great importance to users of electricity generation units, as they aim to ensure the safety of the units and work with the highest possible efficiency, in addition to ensuring the continuity of work on the site without interruption.

Energy Pro offers maintenance contracts for all types of electrical generation units and all capacities, through regular visits on a regular basis whose dates are determined according to the nature of the work on the site. Maintenance contracts include periodic maintenance of the generating units, in addition to carrying out the necessary repairs to the units.

We guarantee quality service and professionalism, as maintenance is carried out by a qualified team well trained in the latest technologies and practices in the field of maintenance. We care about meeting our customers' needs and ensuring their complete satisfaction.

Choosing maintenance contracts with Energy Pro means investing in the safety of your generating units, ensuring they operate with high efficiency and without downtime. Contact us now for more information about maintenance contracts for electricity generating units
